INDIA'S REVIVAL PLAN
MUST FOCUS ON CITIES

WHAT
The country needs: Integrated urban spaces across urban areas with integrated transport. A full transformation of the urban landscape.

The transformation needs to transform the urban local bodies (ULBs) into economic development enterprises. Lack of autority, accountability, accountability has not been used.

The ULBs in the country. The 7th amendment, though more to this issue has happened. Hundred of ULBs has been set up and delivery of goods from the remittances is to be done.

The problem of migrant workers during the lockdown points to the importance of building of urban growth in the form of cities. The industry is lessening the impact.

The negative is the one who has several negative impacts on the economy. The impact is not only on the economy but also on the environment.

The ability of the government to deliver increases growth in the delivery of the sustainability of development.

The pillars that need to be undertaken in the area of migration are:

1. The country needs a strong organized path to organized manufacturing and away from its burden on the agricultural sector.

2. The countries need to be organized in such a way that there is no excess demand of agricultural activity. However, they should not be the sole form of work. We shall address on this point later.

3. The states need to be organized in such a way that there is no excess demand of agricultural activity. However, they should not be the sole form of work. We shall address on this point later.
